Stained Samples

To ensure proper identification and diagnosis of stained samples, precise color is required. Advanced Color Correction Matrices (CCMs) compensate for the visual imperfections caused by light sources and image sensors. To provide true-to-life color in a consistent and repeatable manner, Lumenera has designed proprietary CCMs. As a result, Lumenera is better able to define and contrast colors that are difficult to reproduce including hues of oranges, reds, pinks and yellows. These advanced techniques retune the image to be true to life.

Live Imaging

Combine INFINITY software with our high-speed USB 2.0 and USB 3.0 cameras for smooth, responsive live video preview, or to record brief video clips. Integration with popular 3rd party software is available.
